Stainless inserts

Other Info.

Contents: Ground intermediate (2nd) tap. Inserts. Installation/tang break off tool. Full instructions.

Thread Insert Kits: Manufactured to BS 4377 BS 3049 parts 1 & 2.

Recoil helically-wound thread inserts are formed from 18-8 (Type 304) stainless steel rhomboid shaped by cold rolling.

The resultant wire in most sizes has a tensile strength greater than

200,000 P.S.I. and a finish better than 32 micro inches.

Individual size kits have the basic items needed to perform a thread repair or to install inserts for strong new threads in original equipment or components from new. Range kits include a number of popular sizes.
