Material

SUSXM7 (SUS304 Equivalent), chemical polish.

Options

Alternative surface treatments are available on request. Gold plating, Silver plating, Electroless Nickel plating and Raydent treatment are all available as options. Please contact sales for further information.

Features

- May be used with vacuum chamber applications in clean rooms, FPD (Flat Panel Display) and semiconductor production equipment and devices.
- All clean washed, preventing the inclusion of oil and foreign particles.
- Chemical polishing improves surface roughness and reduces diffusion to microscopic levels.
- Speciality-use product dimensions, profiles, materials, surface treatments, and special packaging.

Applications

Remove trapped gases in the pilot bore through the ventilation hole (SVHS) and gases between the threads through the washer (SWAS-VF) with ventilation grooves.
