SVSS-M6X20-PE	M6	20	10.0	6	5.0	2.0	5.8	10	£69.05

Material

SUSXM7 (SUS304 Equivalent), electro polish.

Features

- May be used with vacuum chamber applications in clean rooms, FPD (Flat Panel Display) production equipment and semiconductor devices.
- Electrochemical polishing improves surface roughness, minimising gas diffusion and preventing foreign particle inclusion.

Options

Products without surface treatment and with chemical polishing are also available.

Applications

Remove trapped gases in the pilot bore through the ventilation hole (SVSS) and gases between the threads through the washer (SWAS-VF) with ventilation grooves.
