SVST-M6X35	M6	35	10.0	6	5.0	24	2.0	4.8	£48.54

Material

TB340C (Type II Titanium).

Applications

Remove trapped gases in the pilot bore through the ventilation hole (SVST) and gases between the threads through the washer (SWAT-VF) with ventilation grooves.

Features

- May be used with vacuum chamber applications in clean rooms, FPD (Flat Panel Display) production equipment and semiconductor devices.
- Chemical polishing and shine polishing improves surface roughness, minimizing gas diffusion and preventing foreign particle inclusion.
- Nonmagnetic characteristics may be used with vacuum chamber applications in clean rooms, FPD (Flat Panel Display) and semiconductor production equipment and devices, and electronic equipment.
