Material

Carbon Steel (CS70)

Performance

Uniform strength and flexibility. Absorbs shock and vibration. Closer diameter tolerances. Equal stress distribution

Wider hole tolerance. Conforms to hole. Swaged chamfers. Low insertion pressure - radial tension

Standard type: ISO 8750**Heavy Duty:** ISO 8748 (available depending on size)**Light Duty:** ISO 8751 (available depending on size)

Other Info.

Prices are listed per individual pin.

Material

Nickel Stainless Steel (AISI.302)

Performance

Uniform strength and flexibility. Absorbs shock and vibration. Closer diameter tolerances. Equal stress distribution

Wider hole tolerance. Conforms to hole. Swaged chamfers. Low insertion pressure - radial tension

Standard type: ISO 8750, **Heavy Duty:** ISO 8748 (available depending on size), **Light Duty:** ISO 8751 (available depending on size)

Other Info.

Prices are listed per individual pin.

Material Carbon Steel (CS70) DIN 1481, ISO 8752

Performance Uniform strength and flexibility. Absorbs shock and vibration. Closer diameter tolerances. Equal stress distribution
Wider hole tolerance. Conforms to hole. Swaged chamfers. Low insertion pressure - radial tension

Other Info. Prices are listed per individual pin.

Material

Stainless Steel Grade 304 DIN 1481, ISO 8752

Performance

Uniform strength and flexibility. Absorbs shock and vibration. Closer diameter tolerances. Equal stress distribution
Wider hole tolerance. Conforms to hole. Swaged chamfers. Low insertion pressure - radial tension

Other Info.

Prices are listed per individual pin.

Material

Stainless Steel Grade 304 DIN 1481, ISO 8752

Performance

Uniform strength and flexibility. Absorbs shock and vibration. Closer diameter tolerances. Equal stress distribution
Wider hole tolerance. Conforms to hole. Swaged chamfers. Low insertion pressure - radial tension

Other Info.

Prices are listed per individual pin.

20.0	20.5	20.9	20.00	20.20	4.0	280.00	-	-	-

Slotted spring pins consist of a single coil of spring steel (or stainless steel) with an open slot sufficiently wide to enable the pin to reduce in diameter as it is driven into a hole of appropriate size. The ends of the pin have a bevelled chamfer. They are designed for plain drilled holes but a countersink makes assembly easier. Slotted pins are normally supplied in the heavy duty form to ISO 8752, but a light duty version can be supplied to ISO 13337.

It is possible to increase the shear strength of slotted pins by inserting a small diameter pin inside a large one. This should always be done by inserting the larger pin first, then inserting the smaller one, taking care that the slot is between 90° and 180° away from the slot in the larger pin. Suitable combinations for pins to ISO 8752 are:

Outer Pin (mm)	Inner Pin (mm)	Outer Pin (mm)	Inner Pin (mm)
2.5	1.5	10.0	6.0
3.5	2.0	12.0	7.0
5.0	3.0	14.0	8.0
6.0	3.5	16.0	10.0
8.0	5.0	20.0	12.0

Supplied in plain oiled finish. Steel pins may be given a protective finish such as zinc or phosphate, but care is needed to prevent the open slots entangling in barrel plating processes. Where electrolytically applied finishes are used it is essential to de-embrittle the pins immediately after plating. Since the de-embrittlement process is not completely reliable, non-electrolytic finishes should be used for safety-critical applications. Where pins are to be installed in plastic it is recommended that they be de-oiled before use to avoid embrittlement of the plastic.

Other Info. Cotter pins are made to DIN94 and also equal to ISO1234 and BS1574. Steel Pins can be zinc plated or phosphate coated, but since such finishes cannot be applied to the inside faces of the pin, only stainless can be recommended where full corrosion resistance is needed.

Material

SCP Type: Low Carbon Steel

SCPS Type: Stainless Steel A2 (WS 1.4301) SCPS1.0 to SCPS1.6, A4 SCPS2.0 to SCPS6.3

Other Info.

Cotter pins are made to DIN94 and also equal to ISO1234 and BS1574.

Steel Pins can be zinc plated or phosphate coated, but since such finishes cannot be applied to the inside faces of the pin, only stainless can be recommended where full corrosion resistance is needed.
